Nadia Danova

Culture de la memoire en Bulgarie d'aujourd'hui à propos de la déportation des Juifs des territoires sous administration bulgare en 1943

(Abstract)

The aim of the communication is to present the different manners utilized in contemporary Bulgaria for facing the painful problem of the participation of Bulgarian authorities in the deportation of the Jews from Thrace and Macedonia during World War II. On the basis of examples from the historiography, textbooks, literature, cinema, museums, memorials and public debate are discussed the difficulties in the construction of one common and indivisible memory on events connected to the theme of responsibility and guilt, throwing the long shadow of the past on the actuality.
